

Mobile Device Management - Intune Enrolment for Windows (Win10 Home edition)

Intune is the technology used for University's Mobile Device Management (MDM) service for staff members. [Find out more...](#)

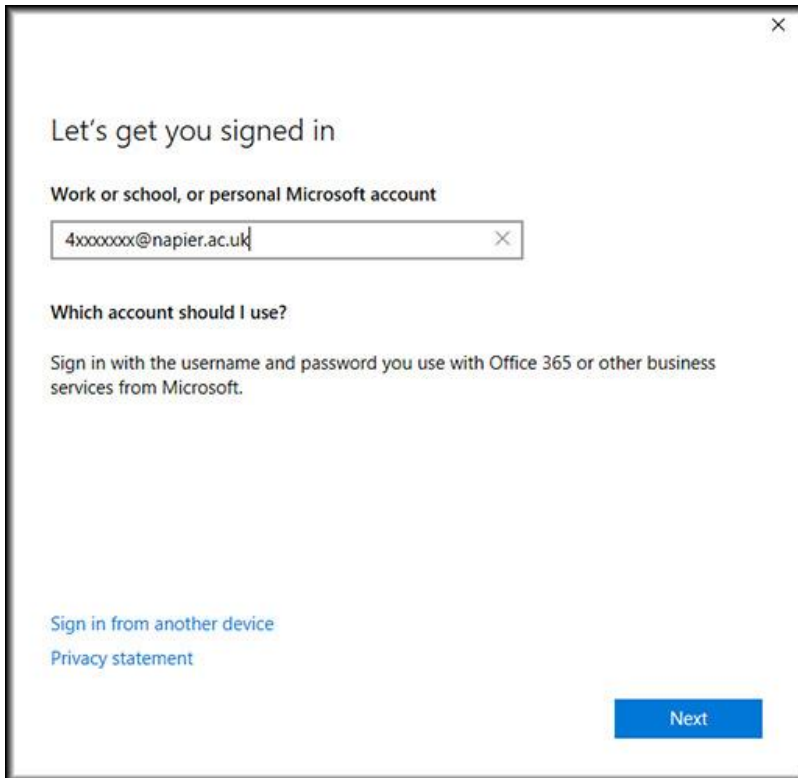

This document explains the installation procedure to enrol Windows 10 Home edition versions (or not requiring to join Azure AD) into Intune MDM. (If your university owned device is Windows Pro or Enterprise, please follow the corporate guide). Your experience may differ slightly depending on the OS version and tablet Vendor or different individual customisation of your device, but the principal procedure will be comparable.

Please note: If the device is currently enrolled in the AirWatch MDM, [contact the IS Service Desk](#) or sign into the AirWatch self-service web portal (<https://ask.napier.ac.uk/article.php?id=634&oid=89>) to unenroll the device before proceeding with Intune.

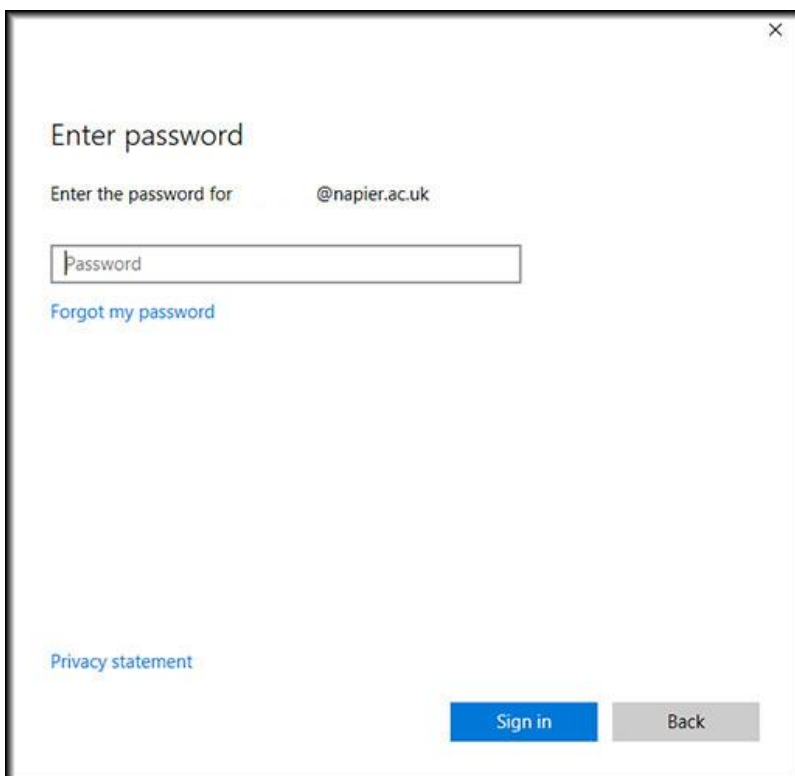

- Download and install the **Intune Company Portal** app from the Microsoft Store.

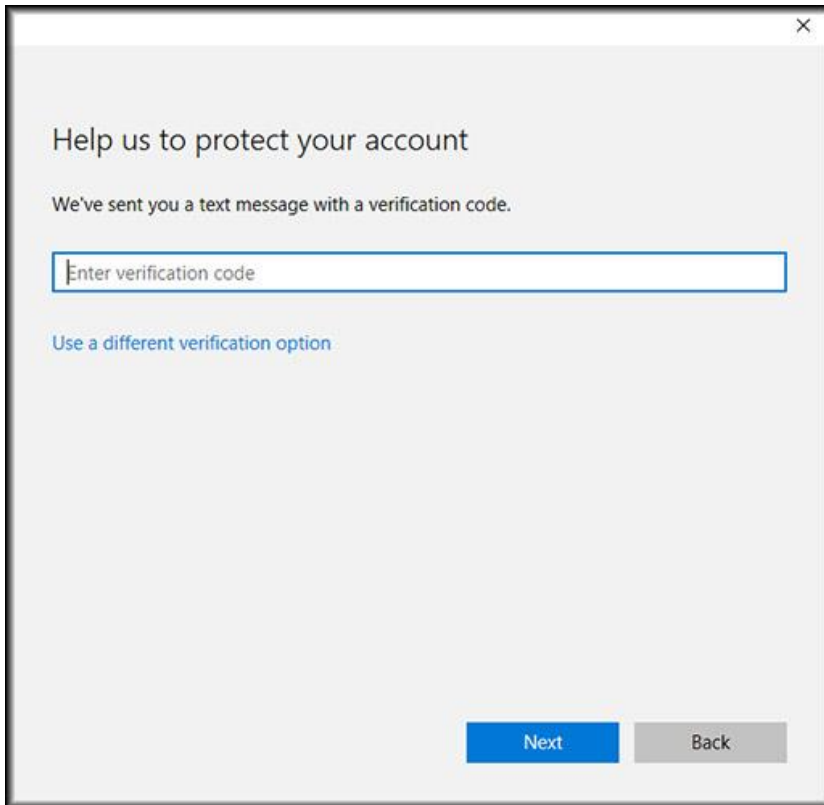

- Open the **Intune Company Portal** app and it will prompt you to sign in with your work account.
- Sign in with your **Edinburgh Napier University login (4XXXXXXX)** followed by **@napier.ac.uk** and click **next**.

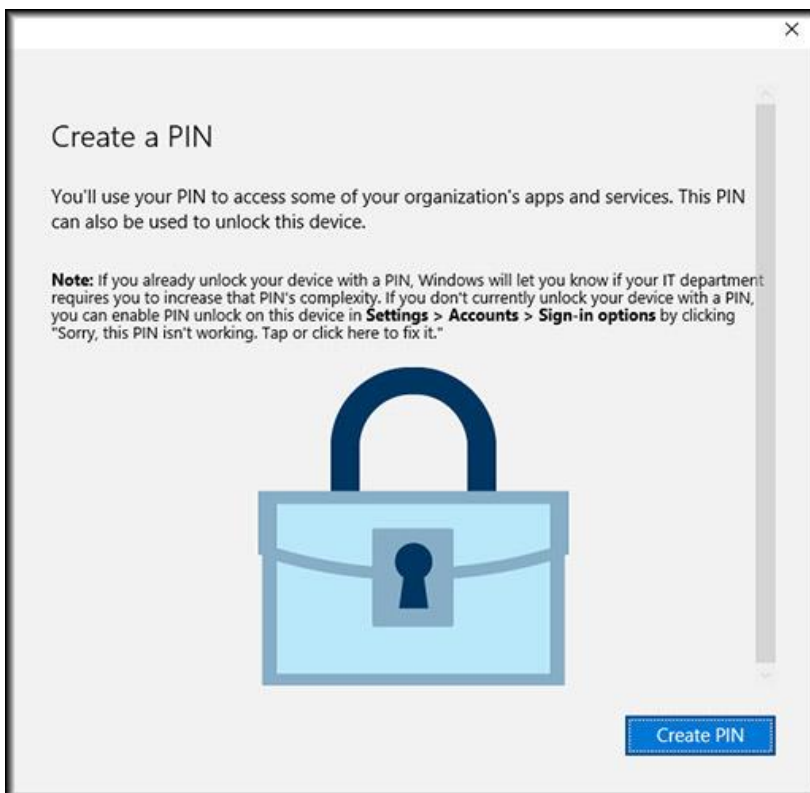

- Enter your **Edinburgh Napier University password** and **Sign In**.

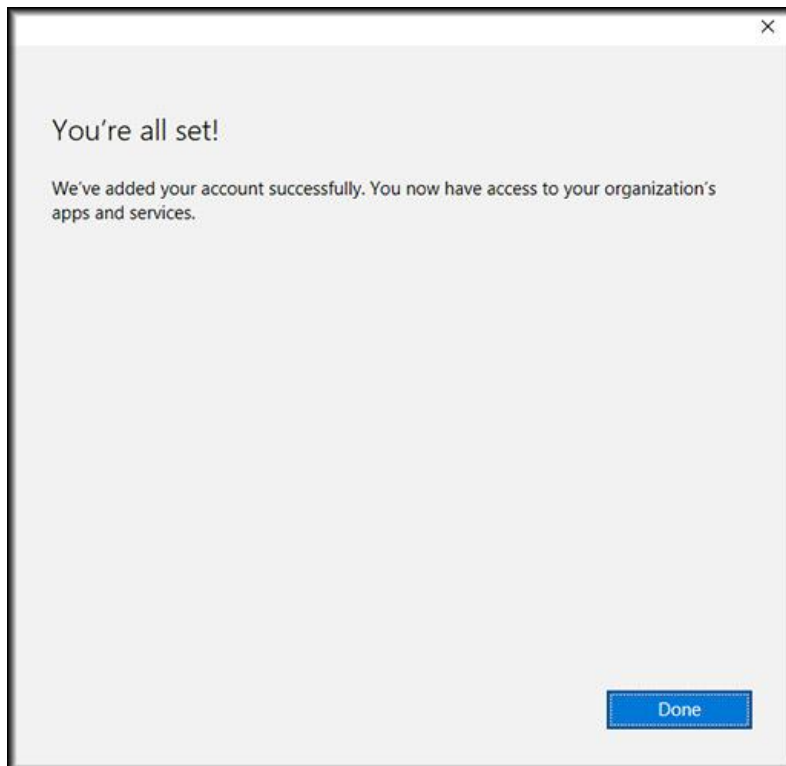

- If you are set up with **Multi Factor Authentication**, you may be requested to enter a verification code.
 - Enter the **code** you were texted and click **Next**.

- You may be requested to create a PIN. Select **Create PIN** to proceed.

- Your account will now be added to Intune.
- Select **Done** to continue.

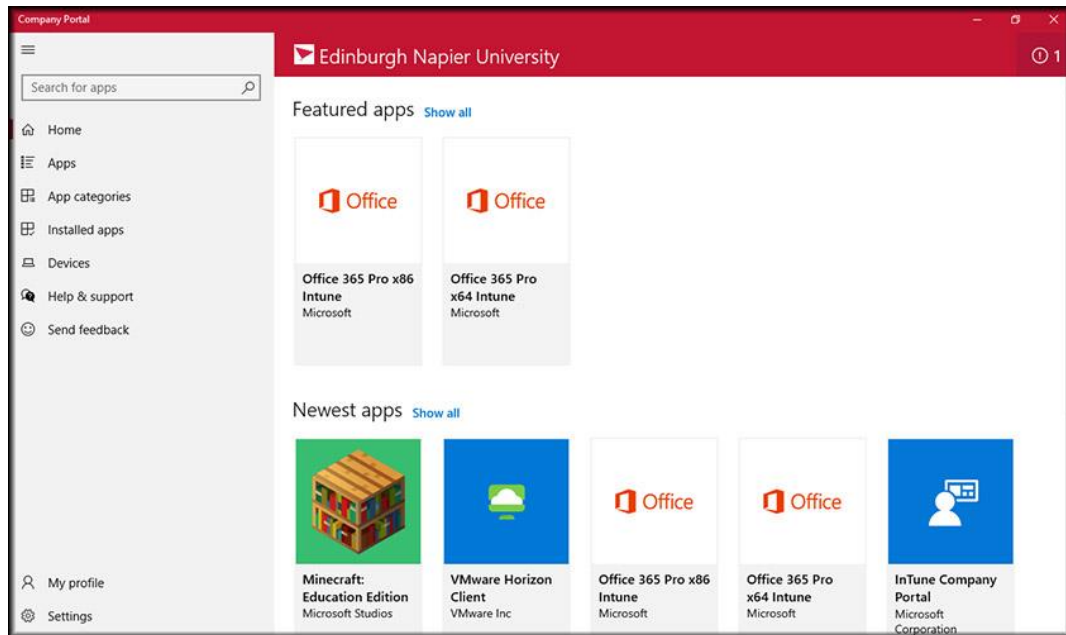

- You may be prompted to apply encryption to your device's hard drives if not already done:
 - **Check** the tick box to verify you do not have another type of encryption software other than BitLocker.
 - Click **Yes** to continue the encryption, or click **No** if another type of encryption software is being used.

- Open the **Company Portal** from the Start Menu. Within the app, you have several options available to you for your device and apps.
 - Click the **Apps** option to see the apps available from Edinburgh Napier.
 - Select the **Office 365 Pro** (x86 or x64 depending on your device) to install Office on your device.
 - Login to an Office app with your Napier University credentials to authenticate.

- Outlook will be included with the Office 365 suite. Add an account with your University credentials to see emails.

- Usually enrolling your device with the **Company Portal** will connect your account to the University. If for some reason it doesn't connect:
 - Open the **Settings** from the start menu of the device, and select **Accounts** in the Settings window.
 - Click on the **Access work or school** option in menu on the left, then select **Connect**.
 - Enter your Edinburgh Napier University **credentials** to connect your account.
