

## Health & Safety Policy

### Summary – Drinking and Eating

---

Food and drink may be consumed in refectories, café areas on campus, and personal accommodation.

In a number of areas where the ingestion of harmful substances is possible or a risk of injury, or damage to equipment exists as a consequence of such consumption, the consumption of food and drink should be prohibited.

Washing hands when entering and leaving laboratory areas is critical to prevent cross contamination.

Where Personal Protective Equipment (PPE) is provided it is imperative that it is worn at all required times and that hands are washed after the removal of the PPE provided for hand protection. Where required/applicable, moisturiser and soap will be made available.
