Campus Location:	Craiglockhart
Line Manager:	Lead IT Developer
Line Management Responsibility for:	NA
Organisational Structure:	<input type="checkbox"/> Tick to confirm attached
Role Summary:	<p>The primary purpose of the Information Services application team is to design, develop, implement and maintain the business and academic IT systems to support the Universities strategic and operational goals. Also to: help staff, students and other key stakeholder engagement with the University's IT systems; cross Information Services (IS) engagement in service improvement, incident resolution and to provide the link between the systems team and frontline staff.</p> <p>The role holder will be the lead in the development of the Office 365 services and, in collaboration with others, will continuously seek opportunities to develop, integrate and enhance the user and business experience through adoption of these.</p> <p>The role holder will proactively support other IS staff to ensure the effective and reliable delivery of interconnected services across the services.</p> <p>The role holder will be required to liaise directly with a variety of University staff, working collaboratively to improve systems and services for the University, students and customers.</p>

Main Duties and Responsibilities

➤	Implement and support new and existing applications and services for the University Office 365 service.
➤	Develop, integrate and enhance the user and business experience through adoption of Office 365 services.
➤	Manage IS Office 365 service development projects.
➤	Liaise with staff at all levels across the University. Work proactively with multiple stakeholders (schools and professional service departments) and provide customers with

	expert help and advice. Provide excellent customer service, demonstrating: excellent communication, problem-solving, interpersonal skills.
➤	Liaise with key stakeholders across the University to prioritise, agree and deliver development priorities.
➤	Contribute to the University's evolving enterprise architecture improvement processes
➤	Design, process-map, manage, test and implement solutions in order to deliver agreed services.
➤	Provide appropriate documentation and training to facilitate the implementation and on-going support of and development of systems and services.
➤	Be fully conversant with the change management and incident handling procedures and ensure they are effectively implemented.
➤	Keep fully informed of the developments in the communications and information office 365 technologies industry and advise on their application and relevance to the University.
➤	Proactively monitor and escalate problems as appropriate
➤	Carry out all duties in accordance with set standards and within agreed timescales.
➤	Be aware of and update current role specific profiles when required in line with the University's Data Protection and GDPR process or Policies.
➤	Participate positively in the University's My Contribution Process.
➤	Work in line with the University's stated values and behaviours.
➤	Any other reasonable duties as may be required by the Lead IT Developer.
