

The Research Cycle

www.napier.ac.uk/is-research-cycle

What is the Research Cycle?

We've taken five key stages from the research process and focused on each stage to bring you LibGuides packed with great information, links, videos, useful book recommendations, How to...? guides and much more! All created by your Information Services Advisors.

What topics can I find out about?

There are Altmetrics, Copyright, Literature Reviewing, Measuring your research performance, Reference Management, Research Ethics, Sharing your research, Write and Publish...and many, many more!

We're still developing, tweaking and fine-tuning the Research Cycle so we'd love to hear what you think about it.
